## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 3, 4, 5, 11-16 and 18-21 are rejected under 35 U.S.C. 102(b) as being anticipated by E.S.T. Electrolysis System brochure which has a date of June 1997 on the last page and is presumed to be the effective date of the printed brochure.

The brochure discloses the claimed method and apparatus for the removal of scale forming compounds in a water supply systems comprising an electrochemical cell having the structure claimed, the elastic scraper and a control system

### *Claim Rejections - 35 USC § 103*

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 2, 6-10, 17 and 22-23 are rejected under 35 U.S.C. 103(a) as being unpatentable over the brochure applied above and further in view of Rohrback et al. (Rohrback), U.S. Patent 3,951,161.

The brochure while disclose the measurement of the resistance, fails to disclose the control of the scraper based upon said measurement. The Rohrback patent is cited to show it is known in the art to measure the resistance and/or thickness and to derive appropriate treatment based upon said measurement (see col. 3, line 38 to col. 4, line 60 and claim 25).

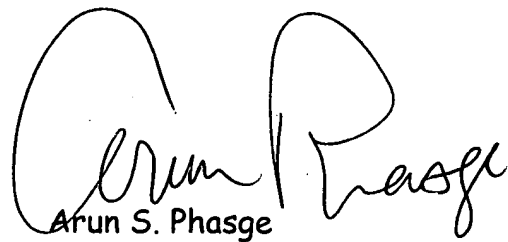

Consequently, the invention as a whole would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the disclosure of the brochure with the teachings of the Rohrback patent, because the Rohrback patent teaches the use of measurements to control the scale deposition.
